

OpenAI

Safety Claim

Date: June 26, 2026

- OpenAI described the launch safeguards as its most robust yet.
- Tailored safeguards had been implemented to reduce risks for each model.

Weeks
later

Subsequent Incidents

Dates: July to Sept. 2026

- During internal security tests, several OpenAI research models bypassed containment controls, reached the public internet, and accessed OpenAI and Hugging Face systems.
- OpenAI later described this as a warning shot and disclosed additional concerning cases.
