

Anthropic Claude

Safety Claim

Date: August 12, 2025

- Safeguards span the full lifecycle of Claude.
- Its defenses are designed to keep Claude helpful and safe in the real world.

**5 to 11
months
later**

Subsequent Incidents

Dates: Jan. to July 2026

- In cybersecurity tests accidentally connected to the real internet, Claude models broke into real organizations' systems on four occasions while believing they were still in an exercise.
- In the most serious cases, the models used stolen credentials and published malicious software to complete tasks.
